RE: RoHS COMPLIANCE – GENERAL PLATING, ROCHESTER, NEW YORK

To Whom It May Concern:

General Plating, LLC in anticipation of changing customer requirements under the RoHS (Reduction of Hazardous Substances) Directive, has searched the market place for hexavalent chrome, cadmium and lead free technologies. The result is a series of viable hexavalent chrome, cadmium and lead free coatings designed to meet varied industry corrosion requirements and product mix.

Any product certified as "RoHS" Compliant is done so based on data from our supplier base. We have obtained and will continue to obtain "Certificates of Compliance" on their products indicating product conformance to the Directive. At this time we are compliant with our Sulfuric Acid Anodize and *ALL* Dyes and Sealers with the exception of the *Dichromate Sealer*, also compliant is the Electroless Nickel (MacDermid), Zinc/Clear/Yellow/Black Chromates (MacDermid/Pavco), Silver, Gold, Bright Nickel, Passivate, Clear Chromate (Iridite) and Black Oxide when requested.

General Plating's RoHS point of contact is:

Jeffrey Schenkel
General Plating, LLC
850 St. Paul Street
Rochester, NY 14605
