RE: RoHS2 COMPLIANCE - GENERAL PLATING LLC, ROCHESTER, NY

General Plating, LLC in anticipation of changing customer requirements under the RoHS (Reduction of Hazardous Substances), EU Directive 2011/65/EU which bans, among other things, the amount of certain hazardous substances that can be used in the manufacture of electrical and electronic equipment (EEE).

Any product certified as "RoHS" Compliant is done so based on data from our suppliers. We have obtained and will continue to obtain "Certificates of Compliance" on their products indicating product conformance to the EU Directive. At this time, the following of our processes are compliant with RoHS/the EU Directive:

- Black Oxide & Black Oxide SS
- Bright Nickel Plating
- Chrome Plating
- Conversion Coating (Chemical Film-Iridite)
- Copper Plating
- Electroless Nickel Plating
- Electropolish
- Gold Plating
- Passivate
- Phosphating
- Silver Plating
- Sulfuric Acid Anodize with All Colors (with the exception of the *Dichromate Sealer*)
- Tin Plating (with the exception of *Tin/Lead*)
- Zinc Plating with Clear/Yellow/Black Chromate

General Plating's RoHS point of contact is:
